

Public Notice
Town of Raymond
Public Health Mosquito Control Program
West Nile Virus and Easter Equine Encephalitis

Spraying to control larval mosquitoes will begin on April 24, 2006 in the Town of Raymond, NH. Larval mosquitoes will be controlled in areas such as marshes, red maple swamps, woodland pools, flooded fields, roadside ditches and flooded storm water basins. Mosquito larvae found in street and parking lot catch basins will also be controlled. The primary control agent will be a bacterium larvacide called Vectobac (BTI) or Vectolex (Bs). Spraying to control larvae will continue as needed until October 30, 2006. Control agents will only be applied where larvae are collected and identified to species. No street spraying is planned in Raymond.

Persons not wishing their properties sprayed should contact (in writing) the following town official: Richard Mailhot, Health Officer @ Town Office Complex, 4 Epping St, Raymond, NH 03077. Information on biological control agents, insecticides, areas likely to be sprayed or any potential hazards is available upon request to Municipal Pest Management Services, Inc. at 603-431-0008 or at swampfixer@verizon.net. Municipal Pest Management Services, Inc. will provide mosquito control services for the Town of Raymond in 2006. Michael Morrison, Entomologist.
